

Environment Policy

30 September 2023

Strandline is committed to environmentally sustainable outcomes for energy, materials and water including preventing pollution and reducing our environmental impact. Strandline values sustainable development and believes respect for the environment and the community in which it operates is fundamental to business success.

Our approach to managing the environment is based on promoting sustainable practices and the rigorous identification, assessment and control of material risks across all phases of our business, from exploration to construction, operation and closure. We engage with stakeholders and take their perspectives and knowledge into account in our decision making.

To this aim, Strandline will:

- Embed an inclusive and high performing culture underpinned by the values of integrity, accountability and performance excellence to ensure environmentally sustainable outcomes.
- Implement responsible management practices and identify opportunities for the efficient use of energy and water, minimise waste and reduce the Company's environmental footprint.
- Manage environmental risks on a site-specific basis to achieve planned outcomes.
- Rehabilitate sites or areas disturbed by company activities to comply with the Environmental Management Plan.
- Consult with and inform the community about Strandline's activities and projects.
- Contribute to conservation of biodiversity and integrated approaches to land-use planning.
- Comply with applicable environmental laws and regulations as a minimum standard.
- Continually strive to improve overall environmental performance.
- Empower each person working for Strandline to take personal responsibility for their actions and ensure authority is given to stop work if a situation is believed to jeopardise the environment.
- Ensure employees are suitably trained in the requirements of environmental management.
- Ensure reporting of all incidents, including near misses, and prompt investigation and corrective action.
- Pursue continual improvement, leading to enhanced sustainability and environmental performance and achievement of Strandline's objectives and targets.
